

The logo consists of the letters 'AOI' in a white, serif font, centered within a dark blue square.

AOI

Welcome to the
AI Supply Chain Observatory

Hackathon: Food Banks + AI

A dark blue wavy line that spans the width of the slide, starting from the left edge and curving upwards towards the right, creating a decorative base for the text.

What is the AI Objectives Institute?

The AI Objectives Institute (AOI) is a non-profit research lab working to ensure that both AI and future economic systems are built and deployed with genuine human objectives at their core, enabled by broad public input and scalable cooperation.

What is the AI Supply Chain Observatory?

The **AI Supply Chain Observatory** (AISCO) is an urgent, multidisciplinary effort to:

1. **Convene:** Cross-pollinate between AI and supply chain experts, leaders, and practitioners
2. **Discover:** Identify critical supply chain risks exacerbated by AI and decision automation
3. **Brainstorm:** Highlight opportunities for AI and decision automation to create more resilient, more chosen, more prosocial and more values-driven supply chains
4. **Policy:** Develop corporate strategies and public policy proposals for safely utilizing AI tools to build resilient, prosocial supply chains while minimizing catastrophic risks
5. **Tech:** Develop inclusive, accessible, sustainable and reliable technology tools that resolve collective action failures and support prosocial decision making around the public goods and virtuous cycles of robust, resilient supply chains

Hackathon Prompt

Create a solution **using AI Agents** to substantially improve or transform the effectiveness of food bank supply chains at achieving their mission of accepting donations, purchasing and warehousing food, and allocating, packing, distributing, delivering food.

Solutions built for **specific food banks** are encouraged.

Yes, that means go out and talk to a supply chain team at a food bank near you!

Prizes

- First Prize - \$2,500
- Honorable Mention - \$1,000
- Audience Favorite - \$1,5000

Why Food Banks?

“53 Million Americans visit food banks, or 1 in 6 Americans”

- Feeding America, 2021

How do I win?

- Make sure one member of your team is **onsite to present**
- Do your homework! Research food banks supply chain teams and find out what unique problems they face
- Build an awesome agent that solves a real problem for food bank supply chain teams. Consider making a deck. **Quantify the problem you are solving, as well as the solution.**
- Remember to have fun!

Why should I participate?

- Get practice building AI agents for a challenging real-world use case
- Contribute to social good. Food banks can benefit from your ideas!
- Network and meet interesting people in both AI and supply chain
- Get feedback from our extraordinary panel of world-class judges
- Compete to win fabulous prizes, including cash, PR, and bragging rights

Hackathon Schedule & Run of Show July 15-17

Day	Phase	Time
15th	Kick Off & Final Team Assignments	6-8pm
16th	Teams Meet & Team Check-In	9am-6pm Pebblebed
17th	Judging & Awards	9am-1pm Capgemini

Judging Panel

Dr. Elouise Epstein 🇺🇸 - the OG procurement legend

Benjamin Roome, PhD - AI ethicist focused and founder of Elosa

Dr. Charlotte Anabelle de Brabandt - Digital Futurist - global thought leader

Knut Alicke - builder of the world famous 30-hour vibecoded S&OP agent

Guillermo Tapia - creator of the Promptcurement agentic platform

Shehab Heddaya - early stage investor and social impact at Plug and Play

Will Drewery - early Tesla CapEx procurement guru & founder of Diagon

Ben Leiken - Arkestro CTO and product leader extraordinaire

Judging Panel

Anna McGovern - Supply Chain Legend and frmr CSCO of New York Food Bank

Aravind Guduru - Product Leader at Microsoft and frmr Amazon Supply Chain leader

Ivan Dobrovolskyi - Sr. Software Engineer at Walmart Global Tech Focused on Agents in SCM

Daniel Sam - Sr. Software Engineer at Meta, frmr ML Engineer at Google

Jay Thakkar - Product Leader at Auditoria focused on procurement automation, frmr Salesforce

Dasaradh Attuluri - Principal Engineering Manager at Microsoft Security Copilot

Guarav Singh Chaudary - Supply Chain Leader at Lucid, Creator of Silicon & Steel
